

Six Links at Home

Dear Family Member:

We are studying the ideas of more than, less than, and about the same. Please help your child complete the table below. Your child should write the name or draw a picture of five household objects in the left-hand column.

Thank you for your help.

Compare the length of each object with the six links on the right. Is the object's length more than, less than, or about the same? Circle your answer.

Object	Circle One
	More than Less than About the same
	More than Less than About the same
	More than Less than About the same
	More than Less than About the same
	More than Less than About the same
