

House Walk

Dear Family Member:

We have been thinking about numbers and tallies. Please help your child count and tally the objects in the table.

For example:  for seven

Ask questions that will stimulate your child's thinking:

- How many clocks and windows are there altogether?
- How many more lamps than chairs are there?

Thank you.

Record a tally for each object in your home. Then count the tallies and record the total.

Object	Tallies	Total
Lamp 		
Chair 		
Table 		
Clock 		
Window
