

Sharing Cookies with Three People

Dear Family Member:

Your child is learning how to divide objects into equal groups (fair shares) and count the leftovers. Encourage your child to use counters, such as pennies or beans, to show the number of cookies for each problem.

Thank you.

Sam, Peter, and Victoria are sharing cookies. They shared a different number of cookies on each day. Draw the number of cookies each person gets on the plates in the middle column. If there are leftovers, draw them in the last column.

Example:

3 People are Sharing Cookies

	Number of Cookies	Number of Cookies for Each Person (Fair Share)	Leftovers
Day 1	12 		
Day 2	14 		
Day 3	16
