

Birthday Party

Show how you solve each problem. Use connecting cubes, ten frames, or number lines.

- John has 5 red balloons and 3 blue balloons. How many balloons does he have?

- There are 9 children at the party. Four of the children are girls. How many are boys?

3. There are some candles on the cake. John put 4 more candles on the cake and now there are 7 candles. How many candles were on the cake?

4. The children played 5 games at the party. They played 2 games before lunch and some games after lunch. How many games did they play after lunch?
