I.  $8 + 2 + 7 = \underline{\quad}$

J.  $1 + 9 + 8 = \underline{\quad}$

**Part 2** Word Problems

Solve each problem and write a number sentence. You may use the number line, ten frame, or counters such as pennies. You may also draw a picture or diagram.

1. Ming had ten cookies in his lunch. He gave 3 to Jackie. How many cookies did he have left?

\_\_\_\_\_

2. Maya has 9 stickers. Jacob has 6. How many more stickers does Maya have than Jacob?

\_\_\_\_\_

\_\_\_\_\_

4. Jerome picked 5 flowers for his teacher. He bought 4 more. How many did he give to her in all?

\_\_\_\_\_

**Part 3** Combining and Partitioning

Fill in the empty boxes and write number sentences to match.

Dear Family Member:

Your child has been learning to represent addition and subtraction using part-whole diagrams like the ones on this page. Help your child fill in the empty boxes and write a number sentence to match. Some problem situations can be solved with addition and others can be solved with addition or subtraction. Your child may use counters such as pennies or beans to help solve the problems.

Thank you.

### Part 2. Word Problems (TG p. 2) Questions 1–4

1. 7 cookies;  $10 - 3 = 7$ ; Possible strategy: I drew 10 cookies on a ten frame and crossed out three. There were 7 left.
2. 3 stickers;  $6 + \square = 9$  or  $9 - 6 = 3$ ; Possible strategy: I made a train of 9 and a train of 6 and compared them. I need 3 more to make 9.
3. 3 rocks;  $5 + \square = 8$  or  $8 - 5 = 3$ ; Possible strategy: I drew 8 rocks. I circled 5 of them to show Shannon’s rocks and there were three left. Those are John’s rocks.
4. 9 flowers;  $5 + 4 = 9$ ; Possible strategy: I counted on from 5 using the number line.
