How Many More

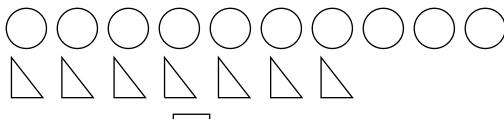

Dear Family Member:

In our study of addition and subtraction, your child has been learning to use addition strategies to solve comparison subtraction situations. For example, "There are 7 girls and 3 boys in line. How many more girls than boys?" They can use counters such as pennies or beans to help them.

Thank you.

1. How many more circles than triangles ?

2. How many more girls \bigwedge^{\bigcirc} than boys \bigwedge^{\bigcirc} ?

3. How many more bananas than apples ?

$$\boxed{} + 5 = 5$$
