How Many More to Ten

Dear Family Member:
 This activity focuses on addition to 10. Since these are important facts to learn, we are using several different ways to show the parts of ten. Help your child read the word problems below. Then help him or her solve the problems and show the answer in three different ways: using ten frames, in number sentences, and in diagrams. The first one is an example. Your child may use counters like small beans or popcorn to help complete the ten frame.
 Thank you.

Solve each problem and show your answer in 3 ways.
