

# Subtraction Story

Dear Family Member:

In our study of subtraction, your child has been writing simple number stories to match a picture. For example, “There were 5 donuts, 2 were eaten, there were 3 left” is a number story. The corresponding number sentence is  $5 - 2 = 3$ . Have your child tell you a subtraction number story about the picture below. Then help your child write the story and the number sentence on the back.

Thank you.

**Look at the picture.**  
**Draw a picture for a subtraction story.**

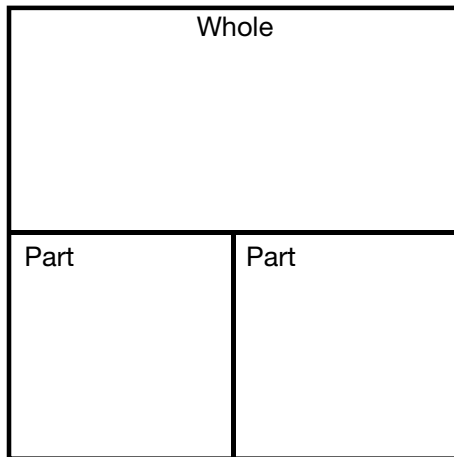

**Write your story. Fill in the part-whole diagram and write a number sentence.**
