

Subtraction Story

Dear Family Member:

In our study of subtraction, your child has been writing simple number stories to match a picture. For example, “There were 5 donuts, 2 were eaten, there were 3 left” is a number story. The corresponding number sentence is $5 - 2 = 3$. Have your child tell you a subtraction number story about the picture below. Then help your child write the story and the number sentence on the back.

Thank you.
