Recording and Extending Patterns

Dear Family Member:

Your child is learning about repeating patterns. Here is an example of a repeating pattern with the pattern unit circled: $\triangle \circ \circ \square \triangle \circ \circ \square$. The pattern unit is the part that gets repeated—in this case, triangle, circle, circle, square. Help your child circle the pattern unit and extend the patterns below.

Thank you.

Write or draw the next four objects in the pattern. Draw a ring around the pattern unit.

1. $\circ \circ \circ \square \circ \circ \circ \square \circ \circ \circ \square$ _____

2. $\circ \circ \square \square \square \circ \circ \square \square \square \circ \circ$ _____

3. **A B A C A B A C A B** _____

4. **A B C B A B C B A B C B** _____

5. **1, 2, 1, 2, 1, 2,** _____
