Name _____   Date _____

Ten-by-Ten Name Grid

Homework

Dear Family Member:

Your child is learning about patterns in class. Help him or her create a name-grid pattern. In class, your child created a name-grid pattern using his or her own name. In this assignment, help your child fill in the grid by writing the first name of a family member many times. One letter of the name should be written in each box. Have your child color the last letter of the name each time it occurs. Be careful not to skip any boxes. Ask your child about any patterns he or she sees. Thank you.

Write the first name of a family member in the boxes below. Put one letter in each box. Color every box with the last letter of the name. Tell a family member about the patterns you see.
