

**Part 6 Problems**

**You may use a calendar, coins, or a ruler to help you.**

1. It rained on Monday and Tuesday, so Maya’s class did not go out for recess. The next three days were sunny and they played outside. What days did they go out?

\_\_\_\_\_

2. Jerome had a dime and two nickels in his pocket. He found a quarter on the playground. How much money does he have now? Show how you found the value.

\_\_\_\_\_

\_\_\_\_\_

3. Tanya measured the length of her jump rope using links. It was as long as 7 groups of ten links and 8 more ones. How long is the jump rope in links?

\_\_\_\_\_

4. Romesh said that he could jump 100 inches up in the air. Could be or crazy? How did you decide?
