

Doubles Board

Dear Family Member:

Your child is studying ways to represent doubling numbers in class.

Things that occur in pairs show doubles: twins, feet, gloves, and shoes. Help your child find or create a picture showing a double number, and help write a number sentence for the picture. An example number sentence for a picture of two feet would be $5 \text{ toes} + 5 \text{ toes} = 10 \text{ toes}$.

Thank you.

Draw or paste a picture of a double. Write a number sentence for your double. Bring this page to school for our Doubles Board.
