

Golden Eggs

Royal Rabbits

The king and the children went to the royal rabbit pen. The king said, “I asked the royal carpenter to build 4 rabbit pens. I have 20 rabbits. If each pen holds the same number of rabbits, how many will go in each pen? If you can solve this problem for me, I will reward you with a bird that lays golden eggs.”

1. How many rabbits will go in each pen? Show your work here.

Home Again

The children thanked the king for the bird and set out for home. When they got there, everybody was happy to have them back. They were also happy to have the golden eggs. The family was rich now. The children could think of lots of hard problems about the bird and the golden eggs.

Golden Reward Problem

Check-In: Question 2

2. Write one problem about the bird and the golden eggs. Clearly show how you solved the problem on the back of this page.

break	put together	evenly	share	take away
divide	between	how many	each	same amount

Name _____ Date _____

This is how I solved my problem:
