

Student Activity Book

Name _____ Date _____

Jason's Club Meeting

A lot of children live near Jason and they formed a club. They have a meeting every time Jason's mom bakes cookies. Jason's sister Lily takes notes at meetings.

Show or tell how solve each problem. Write a number sentence.

- Lily made a table to show where the members live.

Where Members Live

Street Name	Number of Members
Hunter Street	7
4th Street	8
Main Street	5

- How many members live on Hunter Street and 4th Street combined?

Number sentence _____

- How many members live on 4th Street and Main Street combined?

Number sentence _____

Jason's Club Meeting (SAB pp. 11–12)

Questions 1–5

- 15 members; $7 + 8 = 15$
Possible strategy: I know $7 + 7$ is 14 and one more is 15.
 - 13 members; $8 + 5 = 13$
Possible strategy: I know that $5 + 5 = 10$ and 3 more is 13.
- 13 children; $6 + 7 = 13$
Possible strategy: I know that $6 + 6 = 12$ and 1 more is 13.
- 16 members; $9 + 7 = 16$
Possible strategy: I know that $10 + 7 = 17$ and 1 less is 16.
- 11 children; $4 + 7 = 11$
Possible strategy: I started at 7 on the number line and counted on 8, 9, 10, 11.
- 12 members; $8 + 4 = 12$
Possible strategy: I filled up a ten frame with 8. I put 2 more in the first ten frame and 2 in the second ten frame.

How Did They Do It (SAB pp. 13–14)

Questions 1–4

1. Miguel used ten frames. He put 6 dots in the first ten frame. He added 5 more by putting 4 Xs in the first ten frame and 1 in the second ten frame. He got 11.
2. Sara hopped to 6, and then she hopped one hop at a time to count 5 more: 7, 8, 9, 10, 11.
3. Mara knew that $5 + 5 = 10$ and 1 more would make 11. She used doubles.
4. Strategies will vary. Possible strategy: I know that $7 + 7 = 14$, so $8 + 7 = 15$. I used doubles.

Name _____ Date _____

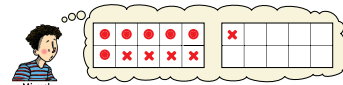

How Did They Do It

Pretend you are a teacher and you are checking to see how your students solved this problem:

$$\begin{array}{r} 6 \\ +5 \\ \hline 11 \end{array}$$

1. Miguel showed his work like this:

$$\begin{array}{r} 6 \\ +5 \\ \hline 11 \end{array}$$

What did he do to solve the problem?

2. Sara showed her work like this:

$$\begin{array}{r} 6 \\ +5 \\ \hline 11 \end{array}$$

What did she do to solve the problem?

Name _____ Date _____

3. Mara showed her work like this:

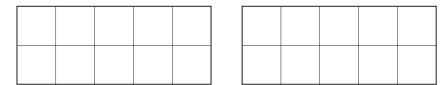

$$\begin{array}{r} 6 \\ +5 \\ \hline 11 \end{array}$$

$5 + 5 = 10$
 6 is 1 more than 5
 $5 + 6 = 11$

What did Mara do to solve the problem?

4. Choose one of the strategies used in Questions 1–3 to solve $8 + 7$. Show or tell your strategy.
