

Use Addition Strategies

Dear Family Member:

In school, we are learning to use different strategies and tools to solve addition problems. These problems build on work your child did in school today. Your child may use counters, ten frames, the number line, or different strategies to solve these problems.

Thank you.

Solve the problems. Show or tell how you solved each and write a number sentence.

1. Mark and his friend Roberto collect baseball cards. Mark has 9 and Roberto has 8. How many baseball cards do they have altogether?

Number sentence _____
