

Student Activity Book

Solve Word Problems (SAB pp. 43–47)  
Questions 1–4

Strategies will vary. Possible strategies are indicated for each problem.

1. 8 ants;  $13 - 8 = 5$  or  $5 + 8 = 13$ ;  
Possible strategies:

2. 3 elephants;  $12 - 9 = 3$  or  $9 + 3 = 12$ .

Name \_\_\_\_\_ Date \_\_\_\_\_

Solve Word Problems

Show or tell how to solve the problems using each tool. Write a number sentence.

1. There was an army of 13 ants. Some ants walked away. Now there are 5 ants left. How many walked away?

Show the problem in a diagram:

Use a ten frame:

Use a number line:

Number sentence \_\_\_\_\_

Student Activity Book - Page 43

Name \_\_\_\_\_ Date \_\_\_\_\_

2. There are 12 elephants at the zoo. Nine elephants are awake and the rest are sleeping. How many elephants are sleeping?

Show the problem in a diagram:

Use a ten frame:

Use a number line:

Number sentence \_\_\_\_\_

Student Activity Book - Page 44

3. 15 monkey;  $7 + 8 = 15$

4. **A.\*** Possible response: I do not agree with Carla. She did not solve it correctly. She put 17 in the “part” box and she should have put it in the “whole” box because that’s the total number of dogs there were before some were adopted.

**B.\*** My answer is 9 dogs. I put 8 in my head and counted up to 17: 9, 10, 11, 12, 13, 14, 15, 16, 17. The answer is 9;  $17 - 8 = 9$  or  $8 + 9 = 17$

Name \_\_\_\_\_ Date \_\_\_\_\_

3. One cage has 7 monkeys. Another cage has 8 more than the first cage. How many monkeys are in the second cage?  
Show the problem in a diagram:

Use a ten frame:

Use a number line:

**Student Activity Book - Page 50**

**Animal Trading Cards (SAB pp. 49–53)  
Questions 1–7**

1. 14¢

$$6¢ + 8¢ = 14¢$$

2. Whale card.

$$12¢ + 7¢ = 5¢$$

$$7¢ + 5¢ = 12¢$$

3. 4¢.

$$9¢ - 5¢ = 4¢$$

$$5¢ + 4¢ = 9¢$$

4. Lion card. Number sentence:  $17¢ - 10¢ = 7¢$ .

5.  $19¢$ .

$$6¢ + 5¢ + 8¢ = 19¢$$

6.\* Responses will vary. Possible response:  
 Nicholas should count the number of jumps he made back to 10: 16, 15, 14, 13, 12, 11, 10.  
 The answer is 7.  $17 - 10 = 7$  Kim can buy a lion card.

---

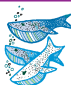

Solve Word Problems SAB • Grade 2 • Unit 1 • Lesson 8 **53**

7. **A.\*** Emily is not correct. She did not understand that she needs to count spaces (or hops), not numbers, on the number line. She started counting at 13 and counted back 8 times: 13, 12, 11, 10, 9, 8, 7, 6.
- B.\*** She should have started with 12 and she would have reached 5. Nisha could buy a whale card. Number sentence:  
 $13¢ - 8¢ = 5¢$

**Student Activity Book - Page 53**

Name \_\_\_\_\_ Date \_\_\_\_\_

### Trading Cards Problems

 Flock of Sheep <b>4¢</b>	 Pod of Whales <b>5¢</b>	 Troop of Monkeys <b>6¢</b>	 Pride of Lions <b>7¢</b>	 Army of Ants <b>8¢</b>	 Litter of Puppies <b>9¢</b>
---	--	---	---	---	--

Show or tell how to solve each problem. Write a number sentence for each. Use connecting cubes, drawings, a number line, or a part-whole diagram.

1. Emily has 17¢. She bought an ant card. How much does Emily have left? Show how to use a part-whole diagram to model the problem.

Solve Word Problems SAB • Grade 2 • Unit 1 • Lesson 8 **55**

**Trading Card Problems (SAB pp. 55–57)**  
**Questions 1–6**

1.  $17¢ - 8¢ = 9¢$

Whole	
17	
Part	Part
8	9

**Student Activity Book - Page 55**

\*Answers and/or discussion are included in the lesson.

2.  $9\text{¢} + 4\text{¢} = 13\text{¢}$

3. Puppy card.  $15\text{¢} - 6\text{¢} = 9\text{¢}$  or  $9\text{¢} + 6\text{¢} = 15\text{¢}$

Possible response: I started at 6 and counted up to 15. My answer is 9.

Name \_\_\_\_\_ Date \_\_\_\_\_

2. How much will a puppy card and a sheep card cost combined? Show how to use the number line to solve the problem.

Number sentence \_\_\_\_\_

3. Chris bought two cards and paid 15¢. One card was a monkey card. Circle the other card.

Number sentence \_\_\_\_\_

Student Activity Book - Page 56

4.  $15\text{¢}. 8\text{¢} + 7\text{¢} = 15\text{¢}$

Possible response: I put 8 in my head and counted on 7 more: 9, 10, 11, 12, 13, 14, 15. My answer is 15¢.

5. Peter spent 4¢ more than Tanya. Possible strategy: I knew Peter spent more but how much more?  $5\text{¢} + 5\text{¢} = 10\text{¢}$  so  $9 - 5 = 4$  is one less or  $4\text{¢}; 9\text{¢} - 5\text{¢} = 4\text{¢}$ .

6. Peter had 10c at the start. Possible strategy:  $\square - 3\text{¢} = 7\text{¢}$  or  $3\text{¢} + 7\text{¢} = \square$ . I thought about a ten frame.  $3 + 7 = 10$  so I knew he started with 10¢.

Name \_\_\_\_\_ Date \_\_\_\_\_

4. Johnny wants a lion card and an ant card. How much money does he need?

Number sentence \_\_\_\_\_

5. Tanya bought a whale card and Peter bought a puppy card. Who spent more money? How much more money did he or she spend?

Show or tell how you solved the problem.

Number sentence \_\_\_\_\_

6. Peter bought a lion card and has 3¢ left. How much money did he have at the start? Show or tell how to solve the problem.

Number sentence \_\_\_\_\_

Student Activity Book - Page 57

Name \_\_\_\_\_ Date \_\_\_\_\_

### Practice with Trading Cards

**Homework**

Dear Family Member:

Your child has been solving addition and subtraction problems in class. Encourage him or her to share some of the strategies and tools used in class. Help your child read and solve the problems below. Ten frames, part-whole diagrams, or number lines are good tools for solving these problems.

Thank you.

**Show or tell how to solve each problem. Write a number sentence.**

 Flock of Sheep <b>4¢</b>	 Pod of Whales <b>5¢</b>	 Troop of Monkeys <b>6¢</b>	 Pride of Lions <b>7¢</b>	 Army of Ants <b>8¢</b>	 Litter of Puppies <b>9¢</b>
---	--	---	---	---	--

1. Carla had 18¢. She bought a puppy card. How much money did she have left?

### Teacher Guide

#### Practice with Trading Cards (TG pp. 1–2) Homework Questions 1–4

1. 9¢ left;  $18¢ - 9¢ = 9¢$ ;  
Possible strategy: I know my doubles.  
 $9¢ + 9¢ = 18¢$ .
2.  $4¢ + 6¢ + 5¢ = 15¢$ ;  
Possible strategy: I found a ten.  $6 + 4 = 10$  and  $10 + 5 = 15$ .
3. He bought a sheep and a whale card;  
 $4¢ + 5¢ = 9¢$
4. Possible responses: He bought a monkey and a puppy card.  $6¢ + 9¢ = 15¢$ . I know  $10 + 5 = 15$  so  $9 + 6 = 15$ ; He bought a lion and an ant card.  $7¢ + 8¢ = 15¢$ . I know  $7 + 7 = 14$  so  $7 + 8 = 15$ .
