

# Check Out Mr. Montes' Math

For each problem, check Mr. Montes' math two ways. Show how you use tools like a number line, *200 Chart*, or coins. Write a number sentence that shows your solution. The first problem is started for you.

1. Kim wants to buy a can of soup for 50¢ and an apple for 29¢. Mr. Montes asks Kim for 79¢.

A. Use the *200 Chart* to solve the problem one way.

41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80

Number sentence  $50 + 10 + 10 + 10 - 1 = 79¢$

B. Finish the picture to show a second way.

Number sentence \_\_\_\_\_

C. Is Mr. Montes' math correct? Show or tell how you know.
