$\qquad$

## Going the Distance: Meters and Centimeters

1. Work with a partner. Measure each distance in meters and then in centimeters. Measure to the nearest whole unit.

| Distance | Meters <br> $(\mathrm{m})$ | Centimeters <br> $(\mathrm{cm})$ |
| :--- | :--- | :--- |
| Line A |  |  |
| Line B |  |  |
| Line C |  |  |
| Line D |  |  |
| Line E |  |  |
| Line F |  |  |

2. Use a meterstick to compare the lengths. Use words, $<,>$, or $=$.
A. 100 centimeters $\bigcirc 100$ meters
B. 100 centimeters $\bigcirc 1$ meter
C. 2 meters $\bigcirc 200$ centimeters
D. Line $D$ is longer or shorter than Line $F$.
E. Line D is $\qquad$ than Line C.
longer or shorter
$\qquad$
$\qquad$
3. How much longer is Line $D$ than Line $E$ ? Write a number sentence to tell how you found the answer. Remember to label the units.

Number sentence $\qquad$
4. Jacob measured Line Z in centimeters.

Do you agree with Jacob? Why or why not?
5. Sam and Liz measured the length of the same line. Sam says the line is 3 meters. Liz says the line is 300 centimeters. Do you agree with Sam or Liz? Why or why not?

| Going the Distance: <br> Meters and Centimeters <br> Feedback Box | Expectation | Check In | Comments |
| :--- | :---: | :---: | :---: |
| Use symbols (e.g., <, >, =) to show <br> comparisons of lengths. [Q\# 2] | E1 |  |  |
| Solve word problems (e.g., compare) <br> involving length. [Q\# 3] | E3 |  |  |
| Recognize that the measure of a <br> length is dependent on the size of <br> the unit of measure. [Q\# 1, 2, 5] | E4 |  |  |
| Estimate length using standard units <br> (e.g., centimeters, meters). [Q\# 2, 5] | E5 |  |  |
| Measure length using centimeters <br> and meters. [Q\# 1, 4] | E6 |  |  |
