

F **Animals**

Show or tell how to solve each problem. Write a number sentence. Use a number line or *200 Chart*.

1. Mark saw eighteen geese in the pond at the park. He also saw five ducks and twelve crows at the park. How many birds did Mark see in all?

Number sentence _____

2. If ten of the geese fly away, how many birds would be in the park?

Number sentence _____

G **Measurement Sense**

Decide if each statement “could be” or is “crazy.” Circle one. Use a centimeter ruler. Explain your choice to your neighbor.

1. Romesh measured his desk and it measured 23 centimeters.

could be crazy

2. Carla measured her desk. It measured 70 centimeters.

could be crazy

3. Work with your neighbor to measure the length of your desk in centimeters.

Length _____

Include units.
