

Measure with a Ruler

Dear Family Member:

We have been measuring with inches and centimeters. Help your child find an object that is about 1 inch long and an object that is about 1 centimeter long. If possible, have your child bring these objects to school to add to a class display. Then help him or her find two other objects to measure.

Thank you.

- Find and measure the length of four objects in inches and centimeters. Measure to the nearest whole unit.

Object	Inches	Centimeters

- What is the length of the longest object? _____
 - What is the length of the shortest object? _____
 - What is the difference in length between the two? _____

Number sentence _____
