

**K** What is My Strategy**N**  $\frac{7}{+5}$ 

Mrs. Jackson gives the following problem to her class.

$$\begin{array}{r} 9 \\ + 6 \\ \hline \end{array}$$

Carl shows his work like this:

$$10 + 6 = 16$$

9 is one less than 10

$$9 + 6 = 15$$

Show or tell how to solve the following problems using Carl's strategy.

1. 
$$\begin{array}{r} 8 \\ + 6 \\ \hline \end{array}$$

2. 
$$\begin{array}{r} 9 \\ + 8 \\ \hline \end{array}$$

**L** Intervals**N**

Use a *200 Chart* to find a number in the intervals.

1. Name an even number between 123 and 127. \_\_\_\_\_
2. What odd number is between 79 and 82? \_\_\_\_\_
3. Name a number that is more than 96 but less than 98. \_\_\_\_\_
4. Name a number that is smaller than 75 but more than 65. \_\_\_\_\_
