

Teacher Guide

Acme Grocery Store (TG p. 1–2)

Homework Questions 1–6

Strategies will vary. A possible strategy is shown for each problem.

1. 60¢
Possible strategy: I added 3 dimes and 2 dimes and that makes 50¢. Then I added 5¢ and 5¢ and that makes another dime. $50¢ + 10¢ = 60¢$.
2. 76¢
Possible strategy: I started at 47 on the 200 Chart and I moved 3 rows below to 77. Then I moved back 1 to the left and my answer is 76.
3. 90¢
Possible strategy: I started at 52 on the number line and made 3 jumps of 10 to 82 and 8 jumps of 1 to 90.
4. 63¢
Possible strategy: I took 2 away from the 25 and added it to the 38. Then I added $40 + 23$ and my answer is 63¢.
5. 58¢
Possible strategy: Since 29 is close to 30, I added $30 + 30 = 60$. Then I took away 2 and my answer is 58¢.
6. 85¢
Possible strategy: For 47, I wrote 10, 10, 10, 10, and 7 ones. For 38, I wrote 10, 10, 10, and 8 ones. I skip counted by 10s 7 times and got 70. Then I added 7 more and that's 77. Add 8 more and that's 85.

Name _____ Date _____

Acme Grocery Store

Homework

Dear Family Member:
We have been working on using strategies to solve addition problems with two-digit numbers. Your child may use the number line, 200 Chart, or an invented strategy to solve these problems. For each problem, your child should write the problem and explain how he or she solved it.
Thank you.

Find the total cost for each problem. Show or tell how you solved the problem.

1. A can of soup and a bar of soap cost _____.
2. A cheese wedge and a can of tuna cost _____.
