

Mass Hunt

Dear Family Member:

Your child is learning to find and compare the masses (weights) of objects. Help your child search for two small objects at home that have similar masses (weights), but different shapes or sizes. (Note: Objects that have the same weight will also have the same mass.)

Thank you.

Draw the objects below. Tell how you predicted they have the same mass.

Bring the two objects to school. Check your prediction using the two-pan balance.
