Passing Time at Home

(Momework)

Dear Family Member:

Students continue to practice telling time to the nearest five minutes. They are also solving elapsed time problems and beginning to develop an understanding of the duration of about one minute, five minutes, thirty minutes, and sixty minutes. Help them decide if the activities listed could be done in the number of minutes passed or not. Thank you.

1. Write the times shown. Find how many minutes have passed. Could the activity be done in that many minutes or is that crazy?
