

They Need Your Advice

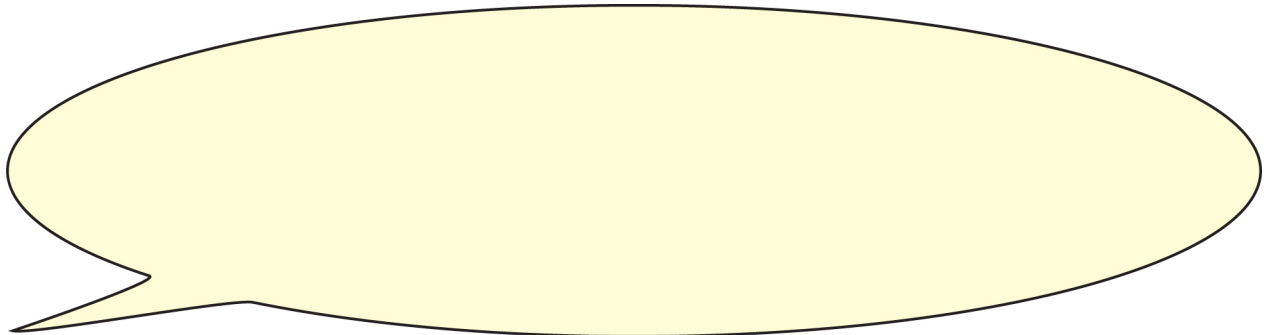

Jason and Emily are solving the pretzel problem. Jason says,

Why should I estimate? I do not have time to estimate because I like to be the first one done. I think $97 - 38 = 135$.

Jason

What would you say to Jason?

Emily says,

I do not like to estimate because my estimates are not exactly right. I only like to find exact answers. When I hear the exact answer, I want to go back and change my estimate.

Emily

What would you say to Emily?
