

Expanded Form Subtraction Practice

Dear Family Member:

Your child has been using a variety of strategies to solve subtraction problems. One of the paper-and-pencil methods introduced is the expanded-form method. Expanded form shows a number expanded into an addition statement. Seventy-three in expanded form is $70 + 3$. One hundred thirty-five in expanded form is $100 + 30 + 5$. It could also be written as $100 + 20 + 15 = 135$.

Thank you.

- Write the numbers in expanded form. Think about base-ten pieces.
 - $94 =$ _____
 - $285 =$ _____
 - $103 =$ _____
 - $117 =$ _____
- Circle the true number sentences.
 - $45 = 40 + 5$
 - $70 + 2 = 60 + 12$
 - $106 = 10 + 6$
 - $200 + 40 + 5 = 100 + 140 + 5$
 - $320 = 300 + 2$
 - $253 = 200 + 40 + 13$
