

**Student Activity Book**

**City Buildings (SAB pp. 529–530)**

**Questions 1–2**

1. \* Building A: 40 cubic units

Possible number sentences:

$$9 + 11 + 11 + 9 = 40$$

$$36 + 4 = 40$$

$$20 + 20 = 40$$

Building B: 88 cubic units

Possible number sentences:

$$16 + 16 + 16 + 16 + 16 + 8 = 88$$

$$8 + 8 + 8 + 8 + 8 + 8 + 8 + 8 + 8 + 8 + 8 + 8 = 88$$

$$11 + 11 + 11 + 11 + 11 + 11 + 11 + 11 = 88$$

Building C: 18 cubic units

Possible number sentences:

$$10 + 6 + 2 = 18$$

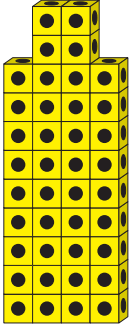

$$5 + 5 + 3 + 3 + 1 + 1 = 18$$

$$2 + 4 + 6 + 4 + 2 = 18$$

\*Answers and/or discussion are included in the lesson.

**Building Detective (SAB pp. 531–534)**

**Questions 1–3**

1. **A.\*** Buildings and building plans will vary. Possible building plan for Romesh’s number sentence:

**B.\*** The tallest column in this plan is 3 units.

**C.\***  $2 + 2 + 2 + 2 + 2 + 3 = 13$  cubic units

2. **A.\*** Responses will vary. Possible building plan with same volume as Romesh’s building:

**B.\***  $4 + 4 + 3 + 2 = 13$  cubic units

Name \_\_\_\_\_ Date \_\_\_\_\_

**Building Detective**

1. **A.** Construct a building and draw a building plan that matches Romesh’s number sentence.

**Building Plan for Romesh’s Building**

$6 + 6 + 1 = 13$  cubic units

**B.** Height of tallest column \_\_\_\_\_

**C.** Volume \_\_\_\_\_

Remember to label your units.

2. **A.** Construct a different building with the same volume as Romesh’s building. Draw your building plan.

**Building Plan for My Building**

**B.** Write a number sentence for your building.

Number sentence \_\_\_\_\_

532 SAB • Grade 2 • Unit 10 • Lesson 4 **Buildings and Plans**

**Student Activity Book - Page 532**

\*Answers and/or discussion are included in the lesson.

3. A. Romesh used 13 cubes to make this building plan. He forgot to fill in one part of the plan. Find the missing number. Write a number sentence.

2	4	1
1	?	2

Number sentence \_\_\_\_\_

- B. Show or tell how you found the missing number.

3. A. Missing number is 3; Number sentences will vary. Possible number sentence:  
 $2 + 4 + 1 + 1 + 3 + 2 = 13$  cubic units
- B. Possible response: I know the volume is 13 cubic units, so I started with 13 and subtracted the values that were listed on the building plan.  $13 - 2 = 11$ ;  $11 - 4 = 7$ ;  $7 - 1 = 6$ ;  $6 - 1 = 5$ ;  $5 - 2 = 3$ , so I know that 3 is the missing value.
