7. Mark wants to fill a fishbowl for his pet, Joe the Fish. The bowl can hold 350 cc of water. The volume of the water and gravel Mark put in the fishbowl is 165 cc. He added a castle with a volume of 98 cc and a plant with a volume of 35 cc. Joe the Fish is 76 cc. Is there enough room so that the bowl doesn't overflow when Mark puts Joe the Fish into the bowl? Explain your thinking.
