# Miguel's Volume Problem

Homework

Dear Family Member:

Your child is learning to read volumes on graduated cylinders. Students learned that centimeter connecting cube are about 1 cc of volume each, so the volume of 12 cubes is 12 cc. Help your child complete the problem below.

Thank you.

1. Miguel put 12 centimeter connecting cubes into water. The graduated cylinder reads 72 cc.

How much water is in the graduated cylinder? Write a number sentence to show how you got your answer.

_____

_____

_____

Number sentence _____
