

S Zoo Stickers

1. Miguel bought 6 rows of turtle stickers. Each row had 4 stickers. How many stickers did Miguel buy? Draw a picture of Miguel's page of stickers.

2. Luis bought 5 bear stickers that cost 10¢ each. How much did the stickers cost altogether? Draw a picture and write a number sentence to show how you solved the problem.

T Measuring Volume

- A. Jessie found the volume of two new pencils. She filled the graduated cylinder to 80 cc. After she placed the pencils in the cylinder, the water rose to 92 cc. What is the volume of the two pencils? Show or tell how you solved the problem.

- B. If Jessie placed two more new pencils in the cylinder, how high would you expect the water to rise? Show or tell how you know.
