

How Many

Dear Family Member:

In class we have been learning how to solve multiplication problems by using various strategies (e.g., skip counting, repeated addition, drawings, constant math hoppers). Ask your child to explain how he or she solved each problem and what each number represents in the number sentences.

Thank you.

Draw a picture for each problem. Then write a number sentence to answer the question.

1. Draw 5 monkey faces. Draw 2 eyes on each monkey.

How many eyes are there in all? _____

Number sentence _____

2. Draw 3 cars. Draw 4 tires on each car.

How many tires are there in all? _____

Number sentence _____
