

It's for the Birds

Dear Family Member:

In class, your child continues to use various strategies and tools to solve division problems. This helps your child develop a good understanding of division concepts. Ask your child to explain how he or she solved the problems and what the numbers in the number sentence represent.

Thank you.

Help the mother birds share the food with their babies. Show or tell how you solved the problem.

1. Each baby bird needs 2 leaves of spinach. Mama Toucan has 10 leaves. Draw the number of baby birds she can feed.

How many baby birds ate spinach? _____

2. Each baby bird needs 4 grapes. Mama Parrot has 8 grapes. Draw the number of baby birds she can feed.

How many baby birds ate grapes? _____
