Share Fairly

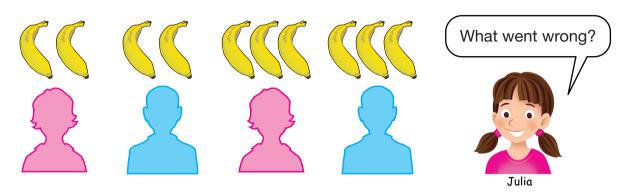

Some children are at a party. They want to share all the snacks so that everyone gets exactly the same amount. Use drawings, models, and words to show or tell how to share fairly.

1. 2 children want to share 11 cupcakes fairly. How many cupcakes can each child have?

2. 4 children want to share 14 cookies fairly. How many cookies can each child have?

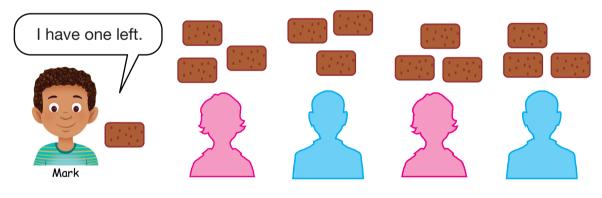

Ν	lame	

3. Julia wanted to share 10 bananas with 4 of her friends so that everyone got exactly the same amount. She did this:

Show or tell Julia how to share 10 bananas with 4 friends fairly.

4. Mark wanted to share 13 brownies with 4 friends so that everyone got exactly the same amount. He did this:

Show or tell Mark how he can share the last brownie with his 4 friends.
