

## **6** How Many More

Solve the problems and write a number sentence.

- 1. Romesh has been to 12 states in the United States. Jason has been to 8 states. How many more states has Romesh been to than Jason?
- 2. Liz saw 12 rabbits at the park. Kathy saw 7 rabbits. How many more rabbits did Liz see than Kathy?

## **H** Becky's Strategy

Becky Bright used a ten to solve 12 - 3. She said, "I know 12 - 2 = 10. So 12 minus 3 is taking away one more. 12 - 3 = 9." Show or tell how to use Becky's strategy to solve 14-5.
