Yolanda solved this problem, but her brother said that she was wrong.

Problem: Sam bought a notepad for 56¢ at the school store.

The clerk gave Sam 39¢ in change. How much money did Sam give the clerk?

Yolanda's solution:

$$\begin{array}{r} 4\ 16 \\ \cancel{50} \\ - 39 \\ \hline 17 \text{ cents} \end{array}$$

Is Yolanda's answer reasonable? If not, solve the problem for Yolanda. If it is reasonable, tell how you know.
