

Put the Pieces Together

The square below is one square unit.

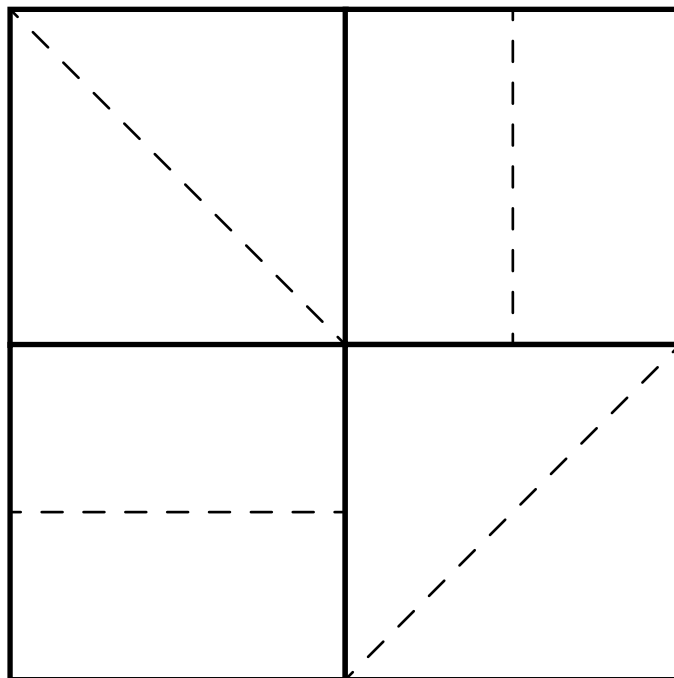

Place the pieces on the whole square to answer the questions below:

- How many halves equal one whole?
- How many fourths equal one whole?
- How many halves and fourths equal one whole?
- How many fourths equal one-half?

Ask someone to check each answer.

- Color the half pieces green and the fourth pieces red.
- Cut apart each of the squares.
- Then cut on the dotted line in each square.

Halves

Fourths
