

Setting Goals

1. The second-grade classes at Bessie Coleman School decided to have a walkathon to raise money for the computer lab. They set a goal of walking 1000 laps by the end of a week.

On Friday they collected the following results from the three classes:

Walkathon Laps

Classroom	Number of Laps in One Week
Room 101	331
Room 102	408
Room 103	398

About how many laps did they walk altogether? Do you think they were close to their goal of 1000 laps?
