

Student Activity Book

Finish It: Addition (SAB pp. 729–730)
Questions 1–6

1. * Possible estimate: 1200

Number sentence: $876 + 421 = 1297$

B.

$$\begin{array}{r} 876 = 800 + \underline{70} + \underline{6} \\ + 421 = 400 + \underline{20} + \underline{1} \\ \hline 1200 + \underline{90} + \underline{7} = 1297 \end{array}$$

C.

$$\begin{array}{r} 876 \\ + 421 \\ \hline 1200 \\ \boxed{90} \\ \boxed{7} \\ \hline \boxed{1297} \end{array}$$

D.

$$\begin{array}{r} 876 \\ + 421 \\ \hline 1297 \end{array}$$

- Students' responses should reflect that they solved the same problem in a variety of ways. If they got the same answer with each solution, they should feel confident that their answers are reasonable.
- Ming showed he added 400 with 4 hops of 100.
- The 8 in 876 is 800 and the 4 in 421 is 400 because they are in the hundreds place.
- Chris wrote 1200 because he added $800 + 400$.
- $1000 + 200 + 90 + 7$

Name _____ Date _____

Finish It: Addition

- Ming, Rosa, Chris, and Levi started solving $876 + 421$. They did not finish. Estimate the sum. Help each student finish the problem using the method they chose.

$876 + 421$

Estimate _____

A. Ming used a number line:

Number sentence _____

B. Rosa used expanded form:

$$\begin{array}{r} 876 = 800 + \underline{\quad} + \underline{\quad} \\ + 421 = 400 + \underline{\quad} + \underline{\quad} \end{array}$$

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

C. Chris used all-partials:

$$\begin{array}{r} 876 \\ + 421 \\ \hline 1200 \\ \boxed{\quad} \\ \boxed{\quad} \\ \boxed{\quad} \end{array}$$

D. Levi used the compact method:

$$\begin{array}{r} 876 \\ + 421 \\ \hline 7 \end{array}$$

Student Activity Book - Page 729

Name _____ Date _____

✓ Check-In: Questions 2-6

- Look back at your solutions in Question 1. Are your answers reasonable? How do you know?

If an answer does not seem reasonable, try again.

- In Question 1A, how did Ming show he added 400?
- In Question 1B, why did Rosa add $800 + 400$ and not $8 + 4$?
- In Question 1C, why did Chris write 1200?
- In Question 1, what do the digits in the answer 1297 stand for? Use words, numbers, or base-ten shorthand to explain.

Student Activity Book - Page 730

*Answers and/or discussion are included in the lesson.

*Answers and/or discussion are included in the lesson.

Help Her Fix It (SAB pp. 733–734)

Questions A–F

See the Lesson for what went wrong explanations. Estimates will vary. Possible estimates given.

A.*

$$\begin{array}{r} 835 = 800 + 30 + 5 \\ + 697 = 600 + 90 + 7 \\ \hline 1400 + 120 + 12 = 1532 \end{array}$$

Estimate 1500

B.*

$$\begin{array}{r} 220 \\ + 798 \\ 8 \\ 110 \\ 900 \\ \hline 1018 \end{array}$$

Estimate 1000

C.*

$$\begin{array}{r} 1 \\ 985 \\ + 473 \\ \hline 1458 \end{array}$$

Estimate 1500

D.*

$$\begin{array}{r} 256 \\ + 132 \\ \hline 388 \end{array}$$

Estimate 400

E.*

$$\begin{array}{r} 714 \\ + 532 \\ \hline 1246 \end{array}$$

Estimate 1200

F.*

$$\begin{array}{r} 1 \\ 837 \\ + 164 \\ \hline 1001 \end{array}$$

Estimate 1000

Shark Day (SAB pp. 735–737)

Questions 1–5

Estimates and solution strategies for Questions 1–5 will vary.

1. Estimate: 1000; $530 + 482 = 1012$ pounds
2. Estimate: 1600; $973 + 618 = 1591$ shark teeth
3. Estimate: 1200; $453 + 712 = 1165$ sharks
4. Estimate = 1600; Possible mental math strategy: Think about money. $75¢ + 75¢ = 150¢$ so $750 + 750 = 1500$. $750 + 750 = 1500$ gallons
5. Estimate: 800; Possible paper-and-pencil strategy:

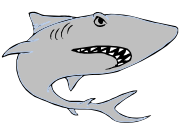

$$\begin{array}{r} 388 = 300 + 80 + 8 \\ + 435 = 400 + 30 + 5 \\ \hline 700 + 110 + 13 = 823 \end{array}$$

$$388 + 435 = 823 \text{ miles}$$

Name _____ Date _____

Shark Day

Mrs. Dewey's class spent a day studying sharks. Use the *Addition Strategies Menu* in the Reference section to help you solve each problem. Estimate first to make sure your answer is reasonable. Show or tell how you solved each problem. Include number sentences and labels.

1. Grace read that one hammerhead shark weighed 530 pounds. Another hammerhead shark weighed 482 pounds. She wondered if their combined weight would be more than 1000 pounds. Find the weight of the two sharks together.

Estimate:

Number sentence _____

Student Activity Book - Page 735

Name _____ Date _____

2. Bull sharks have 50 rows of teeth and can lose up to four teeth a week. A scientist from South Africa had 973 shark teeth in his collection and a scientist from Australia had 618 shark teeth in her collection. When they put their collections together, how many shark teeth did the scientists have to study?

Estimate:

Number sentence _____

3. Scientists recorded the number of sharks swimming along the coast. There were 453 black tip sharks and 712 spinner sharks. How many sharks did the scientists see altogether?

Estimate:

Number sentence _____

Student Activity Book - Page 736

Name _____ Date _____

✓ **Check-In: Questions 4-5**

4. Use mental math to solve this problem.

Darius learned that whale sharks feed on tiny ocean creatures as they take huge gulps of water. A whale shark gulps and filters about 750 gallons of water in 30 minutes. About how much water does a whale shark gulp in one hour?

Estimate:

Number sentence _____

5. Use a paper-and-pencil strategy to solve this problem.

Peter learned that sharks like to travel to warmer waters. Great white sharks migrate between California and Hawaii. One shark swam 388 miles in one week and 435 miles the next week. How far did the shark swim in two weeks?

Estimate:

Number sentence _____
