

# Three-Eyed Exopus

Dear Family Member:

In class, we have been identifying, describing, and extending number patterns. To solve the problems, your child can draw a picture, make a data table, or use addition strategies.

Thank you.

The Three-Eyed Exopus has five squares when it is one year old. It has nine squares when it is two years old.

1 year

2 years

1. How many squares does it grow each year? \_\_\_\_\_
2. Draw a four-year-old Three-Eyed Exopus.

Name \_\_\_\_\_ Date \_\_\_\_\_

3. How many squares does a ten-year-old Three-Eyed Exopus have? \_\_\_\_\_ Show your work.

4. How old is a Three-Eyed Exopus with 33 squares?  
\_\_\_\_\_ Show your work.
