

Playing Number Line Target

1. Michael and Irma are playing a game of Number Line Target. They take turns covering the following numbers: 7, 5, 6, and 2. Show their moves on the number line. What is their sum so far?

2. Michael and Irma play a second game. This time their target number is 30. Michael covers a 9, Irma covers an 8, then Michael covers a 7. What card should Irma cover to reach 30 exactly?

Sketch a number line to show all the turns.

3. Michael and Irma play to 25. They each take two turns. What might Michael and Irma have covered? Sketch a number line and show a possible game. Write a number sentence to match.
