

# Family T-Shirts

## Homework

Dear Family Member:

In class, we solved problems using the number of letters in our first names. Please help your child spell each family member's name on the T-shirts he or she draws for the family. Your child will use these drawings, repeated addition, and other mental math strategies to solve Questions 2 and 3.

Thank you.

1. Imagine your family is making T-shirts with their names on them. Draw pictures of all the T-shirts your family will need. Use the back of this page or other paper for your pictures.
2. If each letter costs 10¢, how much will the letters for your shirt cost? Explain your solution.
3. How much will the letters for all of your family cost? Explain how you got your answer.
