

Helping Professor Peabody

Help Professor Peabody complete the number lines. Be sure that the distance and direction of each hop is clear. Then answer the questions.

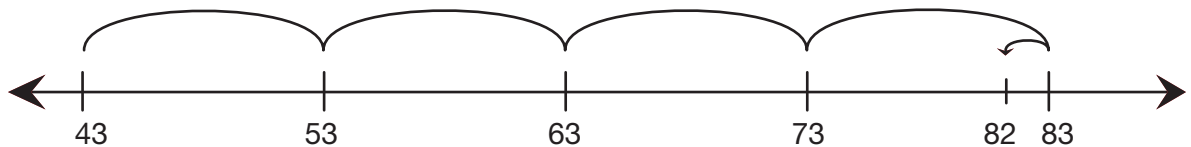

1.

- A. Show the distance and direction above each hop.
- B. Draw a number line below that shows how a base-ten hopper can move from 0 to 38 another way.

2.

- A. Show the distance and direction above each hop.
- B. Show how a hopper can move from 43 to 82 another way.

C. How far is it from 43 to 82? _____
