

K Subtraction: Thinking Addition

Do these problems in your head. Write only the answers.

A. $6 - 4 = \square$

B. $6 - 2 = \square$

C. $8 - 3 = \square$

D. $8 - 5 = \square$

E. $13 - 5 = \square$

F. $13 - 8 = \square$

G. $\square = 12 - 8$

H. $\square = 12 - 4$

I. $12 - 3 = \square$

J. Show or tell how you solved $12 - 3$.

Update your *Subtraction Facts I Know* chart.

L \$1000 to Share

Suppose you had nine \$100 bills and two \$50 bills.

1. How could you divide the money into two shares? Write a number sentence for each way. (The shares do not have to be equal.)

2. How could you divide the money into three shares? Write a number sentence for each way. The shares do not have to be equal.
