

10. Professor Peabody decided that Brand C is the better “picker upper” or the one that picks up the most water. Do you agree with Professor Peabody? Why or why not?

I think Brand C will pick up the most water because it had the spot with the largest area.

Professor Peabody Makes Another Model

After looking at the area of the spots made, Professor Peabody was still not sure which paper towel was the better “picker upper.” He decided to make a different model. He went back to his data to make a new model.
