

# N Averaging Data

Julie looked at a large package of colored candies. She took samples and counted the number of candies of each color.

1. Find the median number of candies for each color. The first one is done for you.

**Color Candies**

C Color	N Number of Candies			
	Sample 1	Sample 2	Sample 3	Median
red	3	5	4	4
brown	11	10	13	
orange	5	1	4	
green	5	6	5	

2. Graph the median number of candies for each color.
