Unit 5: Home Practice

Part 1 **Story Solving**

1. **A.** Frank wrote a math story. Draw a picture of his story.

> Our coach took the team to the batting cage. There were six of us on the team. Six balls were pitched to each of us. It was a fun time.

Frank

B. How many balls were pitched to Frank and his friends in all?

2. While he was at the batting range, Frank bought three baseball key chains, one for himself and one for each of his little brothers. One key chain costs 75¢. If all three key chains were the same how much money did Frank spend? Show or tell how you solved the problem.
