Use your graph to solve Questions 6–10. Draw dashed lines on your graph to show how you found each answer. Then solve each problem another way to check your answer.

6. **A.** Use your graph to show how many lemons Tara and Peter will need to make five pitchers of lemonade.

- B.** Show or tell how you checked your answer using another strategy.

7. **A.** How many lemons do they need to make ten pitchers of lemonade?

- B.** Show or tell how you checked your answer using another strategy.
