

- 5.** Katie had a lemonade stand to earn more money. Every time she sold cups of lemonade to a group of customers, she recorded her sales on a table. Her brother helped her at the stand, but forgot to record some of the sales information. Look for patterns in the table to help you answer the questions and fill in the missing information.

**Lemonade Sales**

Number of Cups Sold	Money Earned
2	50¢
4	100¢
3	75¢
6	150¢
	25¢
	125¢
10	

- A.** How much does Katie charge for one glass of lemonade?
- B.** Katie's neighbor spends 125¢ on lemonade. How many cups did he buy?
- C.** Katie's brother sold 10 glasses of lemonade to some kids playing soccer. How much money was earned?
- D.** If you know the number of cups sold, how can you find the money earned?
