

FF Division Story Solving

Luis and Mara were helping Ms. Alfonso put away some supplies. She gave them some plastic bags and 48 calculators. She told them to put more than one calculator in each bag. She also told them that each bag should have an equal number of calculators in it. Each bag can hold up to 20 calculators.

A. Show or tell how Luis and Mara can pack up the calculators so that Ms. Alfonso has the fewest number of bags to store.

B. Write a number sentence to show your answer.

GG Joe Collects Data

Joe Smart filled in this data table. Moe Smart said to Joe, “You made four mistakes in your table.” Can you help Joe find them?

C Container	V Volume (in cm)			
	Trial 1	Trial 2	Trial 3	Median
jar	490	520	486	490
cup	240	206	225	206
mug	284	272	290	272
glass	207	198	104	198
